FARM QUESTIONNAIRE: SHEEP

1)	HERD	BIOSECURITY	POLICY
----	------	--------------------	---------------

Describe quarantine and processing of newly purchased stock or those returning to the farm (including ewes, lambs, rams, and show animals).

a.	Do vehicles entering farm premises have access restricted to specific areas of farm?	Y	N
b.	Are visitors required to wear boots and other protective apparel and is their access restricted to specific areas of the farm?	Y	N
	Explain:		
c.	Are employees trained in biosecurity measures?	Y	N
d.	Are work routines conducted to minimize disease transmission among animal groups?	Y	N
e.	Are sick animals segregated from the rest of the herd? If yes, where?	Y	N

2) FEED AND WATER

Feed Suppliers

Is feed free from all mammalian derived protein, except milk, and milk products?	Y	N
Is feed free from growth promoters and sub-therapeutic antibiotics?	Y	N
Are feed ingredient tags available for at least one year?	Y	N
Are basic rations for each grouping of animals available for at least one year?	Y	N
Feed records retention – keep a representative ingredient tag for each ingredient tags old tags with current tags as rations change.	ent us	ed.
Are feed bunks filled manually or automatically?		
How much bunk space is available for animals to use?		
How often are feed bunks cleaned?		
Are sheep kept on grazing pastures during grass-growing season?	Y	N
How is animal access to poisonous plants or unsuitable feedstuffs prevented? _		
<u>Commodity Feed Area</u> Is feed kept covered?	Y	N
Are commodity storage areas cleaned between loads of feed?	Y	N
Describe commodity/feed storage (separate or mixed; covered or uncovered):		
How many days supply of feed is available on the farm?		
<u>Water</u> What type of waterers do the sheep have access to?		
How many waterers of each type are in each pen/pasture?		
How often are water troughs checked?		
How often are water troughs cleaned?		
Are water troughs disinfected? If yes, what is used:	Y	N

Are any water filtration/purification systems used?	Y	N
If yes, please list:		
What is the primary water source for the farm?		
What are emergency or backup water sources?		
Colostrum Is a source of colostrum available for lambs which may need it?		
If colostrum is given to a lamb, when is it given?		
Method used (bottle, tube):		
Volume administered:		
At what age are lambs weaned?		
At what age are lambs provided forage or creep feed?		
3) Body Condition Scoring		
3) Body Condition Scoring		
3) Body Condition Scoring When are animals body condition scored?		
3) Body Condition Scoring When are animals body condition scored? By whom?		
3) Body Condition Scoring When are animals body condition scored? By whom?		
When are animals body condition scored? By whom? What type of scoring system is used?		
3) Body Condition Scoring When are animals body condition scored? By whom? What type of scoring system is used? 4) FACILITIES Describe your housing and pen/corral/pasture facilities (number, size, type,

PRODUCER AGREEMENTS
I/we, the duly authorized representative(s) of the operation described in this application, hereby affirm that all information supplied in this document and any attachments is true and accurate.
I affirm that I have read and understood the Humane Farm Animal Care (HFAC) standards applicable to my operation. I affirm my commitment to abide the HFAC certification policies, procedures and standards (§8.2.1.b.). No prohibited products or practices have been used, applied, or otherwise allowed to compromise the integrity of the products sold by me. I understand that failure to comply with the standards or giving false information may result in not being able to sell my products to a Pooled Product Operator that is Certified Humane ®.
I understand that the operation will be inspected annually and may also be subject to unannounced inspection. I agree to report any significant changes to the Farm Questionnaire to you in order for you to notify HFAC and to supply any information needed for evaluation of products to be certified (§8.2.1.b.).
I give permission for HFAC, staff, committee members or field inspectors to visit my farm and examine fields, buildings, animals, files, documents and records. I understand and agree that no HFAC staff member, board member, committee member, inspector, consultant, subcontractor, or volunteer shall be held liable or responsible for any amount in excess of the certification fees paid. I give my permission for HFAC to use subcontractors to perform tasks released to the process of certification (ISO §4.4.c.).
All information provided in this application will be held in strict confidence and will be used by the inspector, office staff and certification committee members for certification purposed only. The above individuals have disclosed potential conflicts of interest and are bound by confidentiality agreements. HFAC has my permission to obtain information, documents, or materials related to certification, suspension of certification, or revocation of certification from other certifiers.
Signature Authorized Representative of the Producer (ISO §8.2.1) Date

Application Instructions

Please complete and return the following to Humane Farm Animal Care, PO Box 727, Herndon, VA. 20172:

- 1. Application
- 2. Processing Fee of \$75.00

Completion of the Application provides HFAC with the following information:

- 1. Animal Health Plan (this should be regularly reviewed in conjunction with a veterinarian.
- 2. **Bio-security Policy** (to limit the introduction and/or spread of disease onto and within the production unit.
- 3. **Nutrition Plan**: Covers all stages of production. What is fed and to which group. In conjunction with regular body condition scoring/weighing to monitor outcome of nutritional management. Safe, hygienic storage of all foodstuffs, the potential to trace back to source.
- 4. Casualty Stock Management Policy: to safeguard the welfare of any sick or injured animal requiring humane destruction on-farm and to protect the health interests of the consuming public. Detailed guidelines are available as follows: Practical Euthanasia of Cattle American Association of Bovine Practitioners; The Emergency Euthanasia of Sheep and Goats California Department of Food and Agriculture and Veterinary Medicine Extension, U.C. Davis; On Farm Euthanasia of Swine Options for the Producer National Pork Producers and the American Association of Swine Practitioners; Euthanasia of Poultry UC Davis Center for Animal Welfare. It is recommended that farm casualty policy adopt the relevant guidelines.
- 5. **Disposal of Fallen Stock Policy**: to ensure the safe, hygienic and legal disposal of animal carcasses. The plan must cover stock dying as a result of natural causes or following on-farm casualty slaughter, and includes fetal material. It must be done in such a way as to not endanger other livestock or humans; such material must not be accessible to dogs and predators. The method must encourage rapid decomposition and destruction of infectious agents and not result in fly or odor nuisance: A number of options are available:
 - a. Disposal off farm via dead hauler, rendering company, licensed landfill site, licensed incinerator.
 - b. On farm burial or composting, if legal.
- 6. **Cleaning and Disinfection Policy**: cleaning and disinfection routines, including chemicals used to assist in the reduction of transmission of infectious agents. This plan must be an integral part of the Bio-Security Policy. The plan should consider:
 - a. Building and equipment;
 - b. Livestock, people, pests and moveable equipment;
 - c. Feed and water.

- 7. **Pest Control Policy:** Manage levels of potentially harmful vermin and pests (rodents, birds and flies) in order to keep to a minimum and avoid the risk of disease spreading to humans and animals, damage to buildings and services, and contamination and spoilage of feed.
- 8. **Farm Waste Management Policy**: Waste materials must be removed from animals accommodation on a regular basis and disposed of properly. Waste materials of any nature must not be a risk to animal health or compromise the control of pets and vermin. The plan will also include the management of clinical and pharmaceutical waste.
- 9. **Emergency Action Plan**: Instructions to staff in the case of fire, flood, freeze or drought. Provision of references for emergency services. Emergency water and feed supplies and necessary equipment.
- 10. **Stock-person Competency demonstrated**, and if possible validated, in husbandry methods (castration/disbudding, etc.) records of all staff wit the responsibility for livestock, identifying livestock experience and any formal/informal training completed.
- 11. **Records**: Records periodically examined by vet/and or others (as an aid to management) provide the verification that objectives of the plan are being met or to prompt adjustments to the plans to ensure that objectives are realized in the future.

You must be in the position to show the Certified Humane Inspector the following at his/her visit to the Unit:

Death and reasons for -

Culling rates and reasons for (when known)

Medicine records including reason for use and withdrawal/safe sale date

Feed and feed ingredient records for previous year

Record of vital automatic equipment maintenance checks

List of routine farm maintenance checks

Training and/or experience of all staff involved in the livestock enterprises

Demonstrate safe, hygienic, well-maintained buildings/environment, handling equipment and automatic equipment.
