FARM QUESTIONNAIRE: YOUNG DAIRY BEEF

1) FACILITIES

For each location you use to raise calves, you must submit a diagram of the property that includes the following information:

- 1. Physical address of the property
- 2. Total acreage of the property
- 3. The location and size of each pen/pasture/corral
- 4. The location and size of buildings and structures, including
 - a. A description of the type of building/structure, the flooring, type of bedding, and ventilation system in each building/structure
 - b. Whether calves are housed individually or in groups in each building/structure, and the maximum stocking rate for each building/structure
- 5. The location of feeders and drinkers inside each building/pen/pasture/corral
- 6. The location of animal handling facilities

Attach the diagram(s) to this application

Describe your animal handling facilities (chutes, restraint systems, handling aids, etc.):
How often are livestock checked?
What protection for animals from inclement weather is provided during: Winter Summer
What protection from predators (dogs, coyotes, etc.) is provided?
Cleaning and Disinfection Policy List compounds, products, and methods used on farm/ranch to clean or disinfect: List:

	Buildings preparation		
	cleaning method		
	disinfection		
	resting (drying)

PRODUCER AGREEMENTS
I/we
I affirm that I have read and understood the Humane Farm Animal Care (HFAC) standards applicable to my operation. I affirm my commitment to abide the HFAC certification policies, procedures and standards (§8.2.1.b.). No prohibited products or practices have been used, applied, or otherwise allowed to compromise the integrity of the products sold by me. I understand that failure to comply with the standards or giving false information may result in not being able to sell my products to a Pooled Product Operator that is Certified Humane®.
I understand that the operation will be inspected annually and may also be subject to unannounced inspection. I agree to report any significant changes to the Farm Questionnaire to you in order for you to notify HFAC and to supply any information needed for evaluation of products to be certified (§8.2.1.b.).
I give permission for HFAC, staff, committee members or field inspectors to visit my farm and examine fields, buildings, animals, files, documents and records. I understand and agree that no HFAC staff member, board member, committee member, inspector, consultant, subcontractor, or volunteer shall be held liable or responsible for any amount in excess of the certification fees paid. I give my permission for HFAC to use subcontractors to perform tasks released to the process of certification (ISO §4.4.c.).
All information provided in this application will be held in strict confidence and will be used by the inspector, office staff and certification committee members for certification purposed only. The above individuals have disclosed potential conflicts of interest and are bound by confidentiality agreements. HFAC has my permission to obtain information, documents, or materials related to certification, suspension of certification, or revocation of certification from other certifiers.
Signature Authorized Representative of the Producer (ISO §8.2.1) Date

Application Instructions

Please complete and return the following to the Pooled Product Operator or Humane Farm Animal Care, PO Box 727, Herndon, VA. 20172:

- 1. Application
- 2. Processing Fee of \$75.00

Completion of the Application provides HFAC with the following information:

- 1. **Animal Health Plan** (this should be regularly reviewed in conjunction with a veterinarian.
- 2. **Bio-security Policy** (to limit the introduction and/or spread of disease onto and within the production unit.
- 3. **Nutrition Plan**: Covers all stages of production. What is fed and to which group. In conjunction with regular body condition scoring/weighing to monitor outcome of nutritional management. Safe, hygienic storage of all foodstuffs, the potential to trace back to source.
- 4. Casualty Stock Management Policy: to safeguard the welfare of any sick or injured animal requiring humane destruction on-farm and to protect the health interests of the consuming public. Detailed guidelines are available as follows: Practical Euthanasia of Cattle American Association of Bovine Practitioners; The Emergency Euthanasia of Sheep and Goats California Department of Food and Agriculture and Veterinary Medicine Extension, U.C. Davis; On Farm Euthanasia of Swine Options for the Producer National Pork Producers and the American Association of Swine Practitioners; Euthanasia of Poultry UC Davis Center for Animal Welfare. It is recommended that farm casualty policy adopt the relevant guidelines.
- 5. **Disposal of Fallen Stock Policy**: to ensure the safe, hygienic and legal disposal of animal carcasses. The plan must cover stock dying as a result of natural causes or following on-farm casualty slaughter, and includes fetal material. It must be done in such a way as to not endanger other livestock or humans; such material must not be accessible to dogs and predators. The method must encourage rapid decomposition and destruction of infectious agents and not result in fly or odor nuisance: A number of options are available:
 - a. Disposal off farm via dead hauler, rendering company, licensed landfill site, licensed incinerator.
 - b. On farm burial or composting, if legal.
- 6. **Cleaning and Disinfection Policy**: cleaning and disinfection routines, including chemicals used to assist in the reduction of transmission of infectious agents. This plan must be an integral part of the Bio-Security Policy. The plan should consider:

- a. Building and equipment;
- b. Livestock, people, pests and moveable equipment;
- c. Feed and water.
- 7. **Pest Control Policy:** Manage levels of potentially harmful vermin and pests (rodents, birds and flies) in order to keep to a minimum and avoid the risk of disease spreading to humans and animals, damage to buildings and services, and contamination and spoilage of feed.
- 8. **Farm Waste Management Policy**: Waste materials must be removed from animals accommodation on a regular basis and disposed of properly. Waste materials of any nature must not be a risk to animal health or compromise the control of pets and vermin. The plan will also include the management of clinical and pharmaceutical waste.
- 9. **Emergency Action Plan**: Instructions to staff in the case of fire, flood, freeze or drought. Provision of references for emergency services. Emergency water and feed supplies and necessary equipment.
- 10. **Stock-person Competency demonstrated**, and if possible validated, in husbandry methods (castration/disbudding, etc.) records of all staff wit the responsibility for livestock, identifying livestock experience and any formal/informal training completed.
- 11. **Records**: Records periodically examined by vet/and or others (as an aid to management) provide the verification that objectives of the plan are being met or to prompt adjustments to the plans to ensure that objectives are realized in the future.

You must be in the position to show the Certified Humane Inspector the following at his/her visit to the Unit:

Death and reasons for -

Culling rates and reasons for (when known)

Medicine records including reason for use and withdrawal/safe sale date

Feed and feed ingredient records for previous year

Record of vital automatic equipment maintenance checks

List of routine farm maintenance checks

Training and/or experience of all staff involved in the livestock enterprises

Demonstrate safe, hygienic, well-maintained buildings/environment, handling equipment and automatic equipment.
